Star X Technology Solutions
Re: Application for Front-End Developer (Vue 3 / React)

Dear Hiring Manager,

I am writing to apply for the Mid-Level Front-End Developer position at Star X Technology Solutions, as advertised. With four years of hands-on experience building production web applications, I have developed a strong skill set in Vue 3, React, and the modern front-end toolchain you require.

In my current role, I am responsible for the full development lifecycle of user interfaces. This includes translating designs into clean, responsive code using HTML, CSS (Sass), and TypeScript, and building maintainable component libraries with Vue 3 and React. I actively collaborate with back-end teams on API integration and am proficient with the essential tools for modern development: Git, Vite, ESLint, and agile workflows.

I am particularly adept at performance optimization and ensuring cross-browser compatibility, which I understand are key for your projects. Furthermore, my fluency in both English and Mandarin ensures I can communicate effectively within a diverse team and with stakeholders.

My experience directly matches your need for a developer who is detail-oriented, proactive, and skilled in both Vue and React ecosystems. I am confident I can contribute immediately to your team's goals.

Thank you for considering my application. My resume provides further detail on my experience, and I look forward to discussing how I can contribute to Star X Technology Solutions.

Sincerely,

Michael Tumuhaise
